

Ground-Based Photometric Surveys in the Era of TESS and PLATO

Joshua Pepper^{1,2}, **Xinyu Yao¹**, & the KELT Collaboration

¹Department of Physics, Lehigh University; ²MIT Kavli Institute for Astrophysics and Space Research
(joshua.pepper@lehigh.edu)

- How can legacy surveys assist in detecting single-transits or gapped double-transits in TESS/PLATO? (SuperWASP, HATNet/HATSouth, KELT, NGTS, Evryscope)
- “Precovery” of ephemerides for large ($R_p > 4R_E$) planets
